PUBLIC HEALTH LABORATORY,
WITHINGTON HOSPITAL,
MANCHESTER M20 8LR

17th December, 1976.

Dr. W. d'A. Maycock,
Blood Products Laboratory,
Lister Institute of Preventive Medicine,
Elstree,
Herts. WD6 3AX

Dear Dr. d'A. Maycock,

Thank you for a most interesting meeting when I visited your laboratory at the end of November. I have been thinking what the best way of carrying out a survey of Lister Factor VIII concentrate would be. I think before letting you have a formal protocol I shall contact the Directors of several Haemophilia Centres to enlist their co-operation, and then I will write to you again when I know how many Haemophilia Centres agree to co-operate and we have some idea of the likely number of batches that will be involved in one years survey.

I shall probably do most of the lobbying of Haemophilia Directors at the annual meeting on January 13th, in the meantime best wishes for Christmas and the New Year. I will write to you again after the January meeting.

Kindest regards,

Yours sincerely,

GRO-C
