Dear Dr. Snape,

Thank you for your letter and details of the Factor VIII batches. Logistically it is going to be impossible for us to scrutinize 1500 donors from so long ago, and both Dr. Smith and I agreed that we would ensure any of our HTLVIII a/b positives do not include the donors mentioned by checking prospectively. It would seem that the donors of plasma for 8 Cxv1526 are due for a donation again within the next few months and hopefully they will be cleared as they come along. I am sure that you will appreciate that it is very difficult to clear them otherwise.

Yours sincerely,

GRO-C

U. Jayaswal, MRCP, Path.,
