

Ref: Cana35

Mr J Canavan EHF1A

From: Dr A Rejman MEDISP/A

Date: 3 May 1991

1. Thank you for passing on to me the letter from Armour dated 24 April.
2. I agree that a short acknowledgement would probably be best.
3. We would fully support the line on reducing use of blood and blood derived products to the minimum compatible with effective medical treatment.
4. This just reminds people not to use excessive quantities, although presumably it is not trying to stop prophylactic treatment, if this is thought to be part of "effective medical treatment".
5. I return the papers.
