Headington
Oxford OX3 7LJ

15th May, 1986

Dear Director,

As you know, it was agreed at the AGM held in Oxford in October 1985 that we would repeat the survey of patients in the U.K. with Haemophilia A, Haemophilia B, or von Willebrand's disease and carriers of Haemophilia A or B to find out the number of patients who are HTLVIII antibody positive in May 1986. We hope that you will help provide this information. We enclose a computer print-out listing the patients with Haemophilia A, Haemophilia B or von Willebrand's disease and carriers of Haemophilia A or B who have been reported by you in your Annual Returns to Oxford as having received plasma, cryoprecipitate, Factor VIII or Factor IX concentrates since January 1980 from your Centre (Centre No. 151). Patients known to have died before 1.1.84 have been excluded from the list. We would be pleased if you could give details of the most recent HTLVIII antibody results on your patients, in the columns provided on the enclosed print-out and return the print-out as soon as possible to Miss R.J.D. Spooner at Oxford Haemophilia Centre in the enclosed addressed envelope which is marked 'CONFIDENTIAL'. The information regarding named patients will be kept strictly confidential and will only be available to Dr. Craske, who is co-ordinating the AIDS surveillance and research projects, and Miss Spooner. To enable us to collate the information in time to prepare a report for all Directors before the AGM in October 1986 the information should be in Oxford by 9th July 1986.

Yours sincerely,

GRO-C

Chairman, AIDS GROUP

GRO-C

C.R. Rizza
Secretary, AIDS GROUP

Dr. S. Al-Ismail,
Morrison Hospital,
Swansea.
