Subject: Recombinant Clotting Factors Working Group - Draft Statement on
Prioritisation

Dear All

As discussed at the last meeting, we have revised the draft statement on patient priority order with much help from Karin Pappenheim. A copy is attached. Given the need to respond to the Birchgrove Group, I would be grateful if you could let me know as soon as possible if you are content with the revised statement or have further comments to suggest. I would like to have this cleared, and if possible publicised on the DH website, well ahead of our next meeting.

Regards.

Charles
