SUPPLEMENTARY CORE GRANT APPLICATION

ENCLOSURE - REPLACEMENT OF OUTDATED COMPUTER HARDWARE AND SOFTWARE. 1997 - 2000.

The Macfarlane Trust carries a detailed 9 page computer file for each of the 1239 people with haemophilia who were infected with HIV/AIDS as a result of treatment with contaminated blood products in the UK. These records are essential for the Trust to carry out objectives set out in the Trust Deed agreed by Government in 1988.

In 1997, the Macfarlane maintained all financial and accounting records in manual ledgers. It was judged by the Trust's Auditors in September 1997 that these should be replaced by a computerised accounting system.

Hardware and software consultants have provided bespoke systems to meet the above requirements for The Trust over the period 1997 - 2000.

The following costs in excess of Core Grant have been incurred over the period 1997 - 2000 inclusive.
