FACTOR VIII: AHG CONCENTRATE

Dr Owen has seen your minute of 11. July 1975. His manuscript comment above reads:

"This is excellent and I recognise that everyone is doing everything possible. I believe we should keep up the pressure. Can I be kept informed on the centrifuges and also the two regions - why are there difficulties and what can be done? I would not easily accept that they should not contribute."

minute was copied

Will you please let me know when you will be replying to Dr Owen's queries, as recorded in the above minute.

18/8/75

I spoke to [redacted] and explained that the problem regarding the two Regions was essentially one of persuading them that they could meet the target we set within the [redacted] resources
