KOATE-HT : LOT NO. 50R004

We have received samples of this batch for release testing but we must have a statement on the protocol concerning the screening of individual donations for antibody to HTLV III.

Would you please send me, as a matter of urgency, a revised page 4 of the protocol bearing the signed statement as included on the protocol sent with the previous batch samples (Lot No. 50P114) in December 1985.

We need this statement on all protocols submitted to the NIBSC.

Regards,

Marie Tatt.
