From FILE 334 / 16 / Vol. 1 (29)

Dr Walford

14

AND

If you have not already seen it you will be interested to see the very helpful letter written by Dr Gerson following the informal chat I had with him last week. I am sure his influence with his colleagues has been particularly helpful in trying to adopt a low key attitude to the leaflet and some uniformity in its distribution.

I particularly like the line suggested in his second option for incorporation in any statement to be issued associated with the publication of the leaflet.
