HIV/HAEMOPHILIAC LITIGATION: GERRY GREEN LETTER

Dr Rejman is on annual leave today so I shall have to reply for him to your specific question to him. The problem over workload on a case-by-case analysis is whether they are going to be happy to accept Dr Rejman's judgement over likely negligence. He will have more experience in this than anyone the HA's will consult and in many ways he has done much of this work already. But if they challenge him, and it is thought important we do have mutually agreed view at this level of detail, then we may have difficulty in releasing him for the necessary time.

I have no comments on the draft reply.
