Expiration Date

Antihæmophilic Factor
(Human) dried
Profilate[®] Heat-Treated
10ml

Contents: One vial Antihæmophilic Factor (Human) dried Profilate[®] Heat-Treated, one vial 10 ml Sterile Water for Injection, one double ended needle, microaggregate filter, and directions for use. Contains no preservatives. *

Antihæmophilic Factor (Human), Lyophilized Powder, to be reconstituted with 10 ml Sterile Water for Injection

CAUTION:
Single dose container for intravenous administration. Discard any unused contents. This product is prepared from human plasma of donors who have been individually tested at each donation and found nonreactive to hepatitis B surface antigen by approved test. However, it is recognized that presently available methods are not sensitive enough to detect all units of potentially infectious plasma.

Instruction: For information on dosage and directions for administration, see enclosed pamphlet.
