Dear Mr. Pettitt,

Thank you for telephoning today about Factor IX
for **GRO-A**, a patient with Christmas disease who
is due to have a knee exploration next week. In view
of what you say about the heat treated material not
being available until October, I have asked the surgeon
if he would defer the operation until that time.

Mr. **GRO-A** is in a good deal of pain from the
knee and has been unable to work since March of this
year. Could I therefore ask you to give him the highest
degree of priority for the heat treated material when
it becomes available?

Yours sincerely,

GRO-C

A. J. Black,
Consultant Haematologist
