Dear Sir

## FACTORATE BATCH T30902

Please find enclosed two Yellow Forms on two patients in the Haemophilia Unit, St Thomas' Hospital, London, who have received Factorate Batch T30902.

Both patients are suffering from hepatitis, they were HbsAg negative before and after treatment, but their liver function tests are abnormal.

We have received no other adverse reactions to this batch of Factorate.

Yours faithfully

**GRO-C**

Pauline A Goldsmith, B Sc, Dip Inf Sci  
Medical Services Manager

For the information of THE COMMITTEE ON SAFETY OF MEDICINES

1. For all drugs, please record serious or unusual reactions. For new drugs record all reactions.
2. Record, on the top line, the drug suspected of causing harmful effects to the patient at normal dosage.
3. Record all other drugs, including self-medication, taken in the previous 3 months. With congenital abnormalities, record all drugs taken during pregnancy.
4. Please do not be deterred from reporting because some details are not known.
