21st September, 1979.

The Medical Assessor, Committee on Safety of Medicines, Finsbury Square House, 33/37A Finsbury Square, London, EC2A IPP.

Dear Sir,

Re: Factorate

Please find enclosed one Yellow Form concerning a report of hepatitis following the use of two batches of Factorate.

Along with the four reports sent to you on 20th August and 10th September, batch S17405 is a common denominator. This patient was, however, HBs antigen negative before and after treatment.

Further to our previous correspondence about this batch, I can now inform you that batch S17405 has since been re-tested for hepatitis B antigen, by Dr Dane at the Middlesex Hospital, with negative results.

I would be grateful if you could add this information to that given on the forms.

Yours faithfully,

GRO-C

R. G. Butchart, B Pharm, MPS Clinical Research Officer.

Enc.

## For the information of THE COMMITTEE ON SAFETY OF MEDICINES 300304

NOTES FOR GUIDANCE

- 1. For all drugs, please record serious or unusual reactions. For new drugs record all reactions.
- 2. Record, on the top line, the drug suspected of causing harmful effects to the patient at normal dosage.
- 3. Record all other drugs, including self-medication, taken in the previous 3 months. With congenital abnormalities, record all drugs taken during pregnancy.
- 4. Please do not be deterred from reporting because some details are not known.

Name of Patient: (Required in confidence to allow linkage with other reports for same patient) UNKNDWN Sex Age or Date of Birth BB		Weight if known 58.5		From (Name and address):   Company doctor or other representative of product   licence holder—   Dr. W.
