INTER OFFICE MEMORANDUM

U0000072

TO : Dr C Swartz
FROM : Dr P Harris
SUBJECT : SERO-CONVERSION IN THE UK
DATE: 25.2.86
REF: PAH/LEW

COPIES TO :

Dr B Terry
Mr K Fitch
Mr R Michelmore
Mr R Christie
Mr C Bishop

Please find attached a confidential memo from Mr Christie concerning one of our UK haemophilia patients. You will see that this patient received a treatment from batch Y69402 and subsequently sero-converted to become HTLV-III positive. Other explanations for this conversion are, of course, possible but in view of his preceding treatment for the period, which exceeded one year, the probability is of a causal relationship with our batch.

This will be reported to the DHSS along with the follow-up data from all the other UK recipients of that batch. However, in advance of that, we shall almost certainly discuss this case with the DHSS on Monday, March 3.

GRO-C

Dr Peter Harris
