Following a telephone request for data from Mr Christie on the morning of 29.09.86, we have ascertained that 4 batches were not included in the revised lists prepared on 25.07.86.

These are:

A23704	285 iu/vial	I/P HT	Released 08.07.85
A24304	555 iu/vial	HP HT	Released 28.07.85
A24704	500 iu/vial	I/P HT	Released 08.07.85
A25004	250 iu/vial	I/P HT	Released 28.07.85

As a result of this finding, all records available relating to Factorate, with the exception of the Despatch Stock Cards, have been checked. (The listings checked: PICD Stock Cards, C R Bishop's Record Cards, SCOS live and dead files, QCD microfilm records, QC Tracer Cards and DHSS Batch Release Certificates).

The full list of 'A' prefixed batches from non-HTLV III tested donors received and sold by the UK company is therefore:

A15201	A15501	A16702	A17002
A20203	A21503	A21603	A21703
A22103	A23004	A23304	A23404
A23704	A24304	A24704	A25004

It does not include direct shipments to markets such as Holland, France and Scandinavia.

Dr Harris has contacted the DHSS with the details of the additional batches and Messrs. Blatchford and Bennett are contacting recipients.

Mr Blatchford is investigating the inability of the system to provide comprehensive lists of the nature required where a recall of undefined batches is necessary. A full report will follow later this week.
