K. Fernandez	G. Mull	J. Wood	

Michael O'Donnell called yesterday to update the situation. Not only has Koate been absolved, but Professor Temperley has given 2/3 of the 1985 business to Cutter - 1.7 million units Koate HT compared to 1 Million to Armour HT. There is also a probability of additional needs by the end of 1985.

Professor Temperley is still interested in using Gamimune to treat AIDS.

Dr. McCann is very interested in obtaining CMV-IGIV to use in his bone marrow transplant patients. As we know, there is at least one other source of CMV-IGIV (Biotest) and I would certainly prefer to see Cutter product used.
