

TO: CUTTER BIOLOGICAL FIELD SALES PERSONNEL
FROM: JANIS J. PETERSON
DATE: NOVEMBER 18, 1983
SUBJECT: CUTTER FORUM - AIDS AND HEMOPHILIA TREATMENT.
STOCKHOLM, SWEDEN - JULY 1, 1983

Many of the professionals that were invited to this forum were unable to attend the federation meeting and requested information regarding the U.S. forum.

The overwhelming concern of the physicians was the fear of AIDS, and the responses associated with that fear. The key message was that more physicians should emphasize personal care and proper treatment of bleeds as a more important concern than AIDS. One physician stated he had "eight patients die of trauma and cerebral hemorrhage last year". He didn't have any die of AIDS.
