re: kryobulin tim 2

dear mr. nicholson,

as already discussed with Mrs. Diernhofer yesterday we would like to state again that the quality control for Kryogulin TIM 2 handed over to Mr. Coombes with the other data required for an amendment of our Kryobulin product license should not be submitted to the British authorities. This quality control is not specific to B.P. requirements. Besides there is no need to present a new quality control in connection with the envisaged amendment from Kryobulin to Kryobulin TIM 2, since quality control has not changed and no additional tests are carried out due to heat-treatment.

kind regards  
mrs. henninger/hb  
licensing department
