Dr. H. Igel,
Immuno AG,
Industriestrasse 67,
A1221 Vienna.

Dear Dr. Igel,

As expected we have now received letters from the MCA requesting information on our intravenous immunoglobulin and also additional information on the plasma donor centres. They also require viral inactivation information following the Hepatitis A cases with the Octopharma product.

The information required is extensive and the information required on viral inactivation and donation centres is required by 18th April and 29th April respectively.

Please could you review the Endobulin batches supplied to UK with expiry dates between 31st March 1994 and 31st December 1995 and supply us with information concerning those batches which were not screened for Hepatitis C.

I enclose the copy letters and would ask you to distribute the information to those persons who will be involved in this exercise. I assume Mrs. Diernhofer and Dr. Jacobson will need to be involved.

Please let me know if you would like us to contact Glenda Silvester or Nigel Goulding to clarify any matters.

I have sent an acknowledgment of the letters to the MCA and expressed concern at the time scale for the extensive information required.

If you wish to discuss this matter then please telephone me today as I shall be on holiday next week. However, Mr. Nicholson will be available in my absence.

Kind regards,

Yours sincerely,
for IMMUNO LTD.
