Mrs. I. Diernhofer,
Immuno AG,
Industriestrasse 72,
A1220 Vienna.

Dear Mrs. Diernhofer,

We would like to thank you for the Feiba and Kryobulin data which we received last week. We will review the documentation and submit it to the DHSS as soon as possible.

We hoped that you would have also been able to supply us with the Prothromplex Variation so that we could have submitted all 3 to the Ministry at the same time. Although from a sales point of view Kryobulin and Feiba are the most important products I am very concerned that our current Prothromplex is still non heat treated and if the DHSS realise this I am sure they will cancel the licence. This would mean a completely new product licence application.

We also feel that the DHSS would give priority to dealing with all three products at the same time - particularly as they are all based on the same change to steam treated product. When we submit the Kryobulin and Feiba, I am sure they will look back at the previous correspondence when all three products were submitted together - and have an enquiry from them concerning the Prothromplex application,

Please can you let us know how long it will take to prepare the Prothromplex application and send it to us.

Kind regards,

Yours sincerely,
for IMMUNO LTD.
