KRYOBULIN VH / Clinical Expert Report

Dear Mr. Nicholson,

we are now providing you with a summary on the questions raised in Mrs. Robert's comments on our draft clinical expert report. Besides, we are sending you a paper from which the statement on the statistical evaluation of the risk of hepatitis B virus infection has been taken. The last sentence in the left-hand column on page 230 mentions a risk of 75 % for hepatitis B virus infection following the administration of non-virus inactivated preparations.

We hope that this information will enable Mrs. Roberts to complete the clinical expert report.

Kind regards
IMMUNO AG
