Edgbaston,
Birmingham. B15 2SG

Dear Dr. Ala, *FM*

Re: Factor VIII Batch No. HL 2882

I have now screened all the Haemophiliacs who received concentrate from the above batch. There were six who received the material. HTLV III screening has revealed four positives and two negatives. It is unfortunate that one of the positives is a mild sufferer. I have not written to Dr. Craske at Manchester as I am concerned regarding confidentiality. If you wish to inform him that I have data on the patients he can, no doubt, contact me himself.

Yours sincerely,

GRO-C

R. M. Ibbotson,
Consultant Haematologist.
