#### HIV HAEMOPHILIA LITIGATION

I have discussed your minute of the 16th February with Dr Jones. We are happy for you to continue offering advice, including <sup>on</sup> the papers mentioned in the Statements of Claim, to departmental colleagues and Counsel. You should not be drawn into signing affidavits that would find their way to the Judge or Plaintiffs. If there are small inconsistencies in your advice and that of expert witnesses, there should be simple explanations that will not lead to any embarrassment.

As we discussed, you could respond to Dr Walford's request for documents that have been disclosed and which bear her signature by referring the matter to EHF1A. They will have to set up formal procedures to deal with such requests.
