

Report of Case

(36)

dob. GRO-A 67

1. Name **GRO-A** Age

2. Hospital ROYAL VICTORIA HOSP. SHELLEY Rd. Bournemouth

3. Home Address of Patient

GRO-A

4. Transfused on VARIOUS DATES 19.. at elmore Hospital, as Out-Patient

5. Jaundice First Noticed on NO JAUNDICE 19.. Incubation period NOT KNOWN days

6. Outcome of Hepatitis: Recovery/~~Death~~ If fatal, date of death19..

7. Transfusion Fluids Used:

Blood NONE containers

CRYOPRECIPITATE AND HEMOFIL
Dried Plasma bottles

[illegible]

8. Brief Clinical Notes: (including, if possible, conditions necessitating transfusion)

Receives blood transfusion of Ld^a Ull - for HAEMOPHILIA
NO previous history of jaundice, HAA positive, also NEG/NEG
Not jaundiced now (yet) at 1st subclerix (See LFTs for 14.6.74)

9. Test for Au antigen/antibody on patient: 16.1.74. ANTIGEN ⊕ ANTIBODY ⊕
 28.5.74. " ⊕ " ⊕
 14.6.74. " ⊖ " ⊖

10. Post-mortem: Yes/No. If yes, give relevant particulars

11. Remarks: eg. Your opinion on validity of diagnosis of serum hepatitis

I think this patient has been infected with some hepatitis but the evidence seems to suggest that HEMOPHIL rather than CRYO-PRECIPTATE is the infecting agent.

Signed
