16 May 1975

Dear Dr Smith

POST-TRANSFUSION HEPATITIS

Thank you for the following reports:-

GRO-A which I agree is probably a case of
post-transfusion hepatitis.

GRO-A This is probably also a case of hepatitis B.

GRO-A Like **GRO-A** this seems to be a case of
hepatitis probably attributable to Factor IX concentrate.

Yours sincerely

Dictated by Dr Maycock
