Dear Dr Hay

Re: William Murphy Dob - 07.11.1934
94 Hilary Avenue, Liverpool L14 6US

Diagnosis: Haemophilia.
Cirrhosis.
Venous eczema with ulceration.

I am delighted to report that we have managed to heal his venous ulcers completely and he is aware that he will have to wear grade two compression below knee elastic stockings for the remainder of his life.

He has recently had a mild flare up of psoriatic plaques on the dorsa of the hands and extensor knees for which I have prescribed Dovonex cream bd.

I have now discharged him.

Yours sincerely

Dr C M King FRCP
Consultant Dermatologist
