PROFESSOR SHIELDS' CLINIC: 10.03.93

12th March, 1993,

Dr. M.S. Feld,
Gresford,
Pilch Lane,
LIVERPOOL L14 0JE.

Dear Dr. Feld,

Re: Mr. William Murphy: dob 07.11.1934
94 Hilary Avenue, Liverpool 14

Admitted: 11.01.93 Discharged: 13.01.93
Diagnosis: Hepatitis, haemophilia, portal hypertension and
oesophageal varices
Operation: OGD & SCLEROTHERAPY - 12.01.93

I reviewed your patient in Professor Shields' clinic today. He is getting no problems at present related to his liver and I have checked his liver function and alpha-feta protein today.

We will bring him back into hospital in June for a gastroscopy under general anaesthetic and sclerotherapy if necessary.

He also showed me an ulcer on the lateral aspect of his right ankle. This appears to have nearly healed with dry dressings and I don't think we have anything further to offer here. We will review him in June.

Yours sincerely,

MR. NICK DAVIES,
SURGICAL REGISTRAR.
