} to narrow

8/6/92

Still awaiting protocol  
? OGD + Sclerotherapy

When will factor 8 levels need to be increased  
Post Whitehouse away today.

8/6/92

Dr Hay, Consultant Haematologist, who  
is not at all happy for this man to have a

full liver w/u and considers it essential to  
restrict investigations to OGD x Scler + anything else  
vital. Clearly prognostic indicator assessment is  
not vital; cannot do OGD x Scler now  $\therefore$

re-admit 28/6/92 for scan 30/6/92.

Guly explained and apologised to Mr Murphy

Discharge Summary In CS of Mr Murphy
