Dear Professor Shields

RE: William Murphy - dob 7.11.34
94 Hilary Avenue, Liverpool L14 6US

William Murphy is a severe haemophiliac with cirrhosis secondary to hepatitis C infection. He has oesophageal varices which you have injected. However, he has not had an endoscopy for about 12 months. I would, therefore, be most grateful if you would consider re-scoping him, with a view to assessing the need for further sclerotherapy. Obviously we will need to give him factor VIII cover plus platelets, and FFP. If you could let us know when he is to be admitted we can sort out this side of things.

Thank you very much for your help.

Yours sincerely

Angela McKernan
