Dear Dr. Feld,

William MURPHY, d.o.b. 07.11.34.
94 Hilary Avenue, Liverpool 14

This man is progressing well with his left knee replacement. The range of movement is a flexion deformity of 10° to flexion of 70° and I doubt if this is going to improve. However, he has no pain in the knee and he is pleased with the results.

We need to keep an eye on him and I have therefore arranged to see him again in one year's time with x-ray of his left knee on arrival.

Yours sincerely,

MR. C. WALKER,
Senior Orthopaedic Registrar
