

JAN 1994: "HAM" "PSORIASIS" NO EYE REF. CLINICAL
TRIAL CANCELLED

241

ROYAL LIVERPOOL UNIVERSITY HOSPITAL

CONTINUATION SHEET

SURNAME Mr Mrs Miss	INITIALS	SEX	AGE	WARD	CONSULTANT	UNIT No.
DATE						
12 January 1994						
William Murphy						
Diagnosis						
Cirrhosis of the liver Severe Haemophilia HIV negative						
<p>Mr Murphy is reasonably well in himself. His psoriasis is playing him up a bit but is responding to the steroid cream prescribed by Dr King. I think we just about have his hypo-albuminaemic peripheral oedema and ascites under control, with Amiloride 10 mgs daily and I have not changed this in any way. We have recruited him to the clinic trial no: 93/R831/011 entitled 'Clinical Safety and Efficacy Study of Recombinant Factor VIII (r-VIII SQ), Kabi Pharmacia AB Sweden, During Long Term Prophylaxis and/or On Demand Treatment in Previously Treated Haemophilia A Patients'. In addition, we would expect him to participate in the surgical protocol, should he require any surgical intervention during the 12 month follow-up of this product. We will review him in a couple of weeks to actually initiate the trial.</p>						
<p><i>Handwritten:</i> cancelled due to his Liver Problem. Please call from Dr. Angela.</p>
