

- 8) Sheet 624 shows a public health (HEAU) return stating again that Hep Bs Ag Neg. Why was it sent as this was dated 3/2/82?
- 9) We then have a gap until 1986
- 10) Sheet 625 relates to [REDACTED]
- 11) Sheet 626 states categorically HIV NEG 26/2/86
- 12) Sheet 627. Five years after Hep was contracted, although we didn't know it then, the 'History of Viral Hepatitis' question is ~~is~~ ignored. This is bad documentation. No less. Sheet 628 is the same
- 13) Sheet 629 states HIV positive Hep B suspected. Please explain? Sheets 630 and 631 also both show HIV positive with Hep B suspected. At best this is poor documentation. At worst this is wrong diagnosis. Either way confidence is not inspired. It is at this stage that you really begin to ~~be~~ question the reliability of the documentary evidence. 8/1/87
- 14) Sheet 632 clearly states 'HIV positive haemophiliac'
- 15) Sheet 634 is a request for Bs Ag Neg. Why? 4/1/87. It tells HIV positive then that's it.
- 16) Sheet 635 asks for HIV status. Why?
- 17) Sheet 630 declares HIV positive 23/10/87

18) Sheet 637 restates the Viral Hepatitis 'Yes' chain.
Re-inforced on Sheet 642

19) Sheets 643 and 644 are FAZAK public health documents dated November 1988. They refer to hepatodigital state. Why the concern?

20) Incredibly Sheet 646 confirms there were still doubts over HIV status as well as Hepatitis.
24/4/89

21) Sheet 651 again shows queries over HIV and HEP in clinical notes. 25/7/89. What's going on here?

22) Sheet 652 continues the 'Viral Hepatitis ?' 'Yes' chain.

#

3/2/82 Lazak return sample results
stating again Hep B & Ag Neg
Why sent?

GAP THEN UNTIL 1986

625 : Relates to [REDACTED]

626 : 26/2/86 HIV Neg

627 : 25/2/86 Hepatitis questions not ticked
Why not

628 : Ditto

629 : HIV Positive ! Hep B suspected
8/1/87

630 : HIV Positive !

631 : HIV Positive !
Hepatitis Not marked

632 : HIV + Haemophilia

634 : Re-assess for B & Ag Neg 4/7/87

635 : HIV status required

636 : HIV positive ! Check Ag B & Ag HIV Ab HIV Ag
23/10/87

637 : Viral Hep ticked 'Yes' again as is 642

643/644 are Public Health Alerts dated Nov 88
referring to Hep A outbreak state.
Why?

646 : 24/4/89 HIV status still needs checking
as well as Hep strains

651 : 25/7/89 Hep and HIV still being checked
at dental sites

652 : Viral Hep 'Yes'

669 : 24/10/90 NB All Hemophiliacs must be treated
as high risk despite HIV status
Why?

678 : Parvovirus?

WAITING FOR MRS FORBES (REPEAT)

7.20pm

Radio 4

The Rev Kenneth Forrester is chaplain to the small Anglican community in Pau, south-west France. His church, St Andrew's has no bells, no verger, no jumble sales - just a tiny congregation of expatriates who gather to hear true-blue ideas and sermons - more ancient than modern..... Ray Gosling lifts the lid on a twilight world in the Diocese of Fulham and Gibraltar

Purposes of image: 1) the red-papers date from Christmas 1996 (BBC Radio Press Sheets). Point being that we finally and unpreparedly received our father's medical records only shortly before Christmas 1996 and were immediately poring over them, throughout that festive period using whatever scrap we had to hand. 2) the sheet numbers we cite refer to the original numbering applied to the medical records by the Royal Liverpool University Hospital.
