Haematocrits -20 → 500 flet
Wound superficial swelling ↓.
Could hear alogists please review
No N/V def.

John

24/12/91 - Haematology -

② Knee / leg unchanged today from how it has appeared over last several days. We decided to ↓ FVIII to x1 daily from yesterday (1/2 Dr. Kaye myself as now 2/32 post op).

③ Knee was more painful yesterday but better today -

To give FVIII - 4 bottles x1/day in morning.

Stop 9c heparin. *J. Wilde*
52.

27/12/91 - Haematology -

Has persuaded staff to give him 4 bottles b.d. over last 2 days!!
Denies he instigated this himself - says "someone" arranged this since my last note of 24/12 -

1/3 = Prof. Klemmman this am - he is happy with wound -

To continue on FVIII 4 bottles x1/day
Check FBC.
