DR C M KING'S CLINIC 4 JUNE 1993

8 June 1993

Dr M S Feld
Gresford
Pilch Lane
Liverpool
L14 0JE

Dear Dr Feld

William Murphy, 7.11.1934,
94 Hilary Ave, L14.

Diagnosis: Haemophilia and chronic hepatitis C.
Chronic venous insufficiency.

I am delighted that his leg ulcer is now healed following a few weeks treatment with 4 layer compression bandage.

He continues to have some venous eczema around the right lateral malleolus and we shall therefore continue with the above treatment on a weekly basis (carried out in the OPD Clinic at RLUH) and he will be reviewed in 1 month.

Yours sincerely

Dr C M King FRCP
Consultant Dermatologist
