

1995

Dear (M.P. Name)

My Uncle who suffered from Haemophilia died Sept '94 from Liver Cancer after being infected with the Hepatitis C Virus. (H.C.V)

My Uncle one of three Brothers with Haemophilia was infected with HCV. through receiving contaminated blood products clotting concentrates as part of his N.H.S. treatment. His two Brothers died from N.I.V after being infected with the same contaminated blood clotting concentrates as part of their N.H.S. treatment. <sup>Had to bear</sup> the suffering that all three brothers ~~suffered~~ was equal.

I ask for your support for the Haemophilia Society in their Hepatitis C campaign and feel that the government must see that there is a moral case for providing financial recompense to those infected with H.C.V. There are many similarities with the N.I.V. infection yet those infected with H.C.V. can get no financial help at all from the government.

The Society is therefore calling on the government to provide.

A.B.C.D.

So for other families who have or will <sup>be</sup> ~~have~~ in this position, on their behalf I ask that you give the Haemophilia Society your support.

E. O'HARA (M.P.)
