

13/1/92

Hb 101

APTT 55

Wc 6.4

Calc 2.75

Plt 63

PT 20.5

Control 14.5

Pre-heparin 20% -

Post-heparin 64%.

Due for 7 bottles factor 8 bottles tonight
for review a.m.

14/1/92 - Haematology.

Bill has developed gross swelling
of his scrotum/penis over last
1-2 days. Also has oedema of @ leg,
@ thigh + abdominal wall & probably
some ascites. J.V.P. possibly elevated
also. Liver/spleen not obviously
palpable. @ free stable - no new bleed.
↑APTT/↑PT/↓Plt^{lets} along with gross oedema
is keeping with liver dysfunction 2° to
chronic liver disease.

D/w Dr. Hay -

①. Maintain Full: C at 100% by
b.d. dosage

∴ 5 bottles Monodote this am
to see port levels.

②. Spirpolactone 100mg o.d.

③. Vitamin K 10mg 1/2 slowly as this
may help prolonged coag. test.
