

Pathology Department,

24th May 1983.

Dr. B. A. McVerry,
Consultant Haematologist,
Royal Liverpool Hospital,
Prescot Street,
Liverpool, L7 8XP.

Dear Tony,

re: MURPHY, William, (D.O.B. 7.11.34)
94 Hilary Avenue, Liverpool 14.

This is the third Murphy brother who has haemophilia. He would like to be considered as a candidate for home therapy. You may remember him in January 1982 when he had a vagotomy and pyloroplasty for a bleeding duodenal ulcer. This was followed by an attack of non-A, non-B hepatitis, from which he appears to have made a complete recovery.

He has fairly severe haemophilia with a factor VIII level of about 2%.

Yours sincerely,

John A. Campbell.
Consultant Pathologist.
