Why did you compensate HIV  
Explain the difference between the 2  
VIRUS that Overpopulation. Suffer from.  
But are infectious, but are collected from  
Blood product factor VIII. Death is the result  
from both.

11 He Malone stated that there were Special Circumstances  
regarding HIV. Clinical as well Social. He mentioned  
the Social side is employment, housing, Insurance.  
Social Circumstances with HIV is also employment housing Ins  
and many clinical problems.  
Malone mentioned both HIV is a family of 3 Brothers.  
He Malone has no idea as to how these viruses  
are not only similar they both kill.

11 HIV C has been referred to as a sneaky virus.

6  
1  
1919  
1919

Dennis Sherlock Sherlock stated that they had known  
for a number of years it was serious a blood cancer and  
not dead to was leading to cirrhosis and liver cancer. HIV C  
After many years a diagnosis was diagnosed.  
1919 first test was a the antibody it said later after  
the test of Europe & America was started testing.  
In Scotland the B/T/3. Tested all their donors by  
doing so, they were able to treat them and the patient  
who had received their blood. Record was kept and several

loss of Salary £30,000  
Looking in of Policies. Due to being made redundant in early 1988 his pension was frozen in 1989. 1990 Pension rules changed so which enabled by husband to contribute to pension, access to his pension, this was withdrawn for fear of what may be to be reduced by the insurance company to make the pension null. void. this pension was crashed early at a great loss of money.  
his last employment was for 4 yrs so his pension when he left in 1990 was very small but per month, which now leaves me a pension of 198 per year.

26 Careful monitoring. Symptom to watch for and report for follow up

28, why when in 1989 NCU was shown about we ever told in 1992 and 1994 before we saw a live consultant.

My husband was a Haemophilic who died  
from liver cancer, as a result of being  
infected with the Hepatitis C virus, from  
treatment with contaminated blood products  
factor 8 as part of his N.H.S. treatment

My husband came from a family who  
suffered from Haemophilia, our grandson has  
inherited the disorder.

My husband and his brothers were all  
given the same treatment during 1979/1981  
from which by 1985 it was discovered that  
you had either been infected Hepatitis C  
or H.I.V. All Late

(FOR 181)

What the medical Profession say about Hep.C.

Hepatologist Dr. Ghotkey Dushko R.H.

One of the diseases he would loose like to have

Pathologist Dr. AMAC DHILLON R.H.

Over a decade the liver will be completely destroyed, Liver Cell Cancer is frequent

After cirrhosis clinical complication are such that the patient cannot survive without a transplant

Dame Sheila Sherlock R.H.

It is a very sneaky disease

It had been known about for a number of years<sup>1</sup> It was very serious and was blood spread and leading to cirrhosis and Liver Cell Cancer.

After many years this virus was discovered in baltic penia and an antibody test became available to be used by many people 1989 John Barbara, BTS refused to test because of the risk of losing donors and the cost involved, so this infected blood went into the system.

U.K tested in 1991 18 months after the rest of Europe and America.
