Gresford  
Pilch Lane  
Liverpool  
L14 0JE

Dear Dr Feld

RE: William Murphy - dob 7.11.34  
94 Hilary Avenue, Liverpool L14 6US

Mr Murphy presented today with a week old substantial right quadriceps bleed, which appears to have largely resolved. There is extensive bruising, and he actually looks anaemic. I would not be at all surprised if he has not lost a couple of pints into his quads.

The initial muscle shortening seems to have resolved, and he is now able to straighten the leg. He has a sty in his right eye, and I have prescribed him Amoxyl for this. We discussed the recombinant 8SQ (Pharmacia) trial at length, and he is keen to participate. I have given him a patient information sheet to take away with him, and we will review him in 3 weeks time with a view to starting the trial.

Yours sincerely
