Consultant: Dr. I.T. Gilmore

13 July 1994

Clinic: 8.7.94.

Mr. Hartley,
Senior Surgical Registrar,
Link 5C,
Royal Liverpool University Hospital.

Dear Mr. Hartley,

Re: William Murphy (7.11.34)
94 Hilary Avenue, Liverpool 14.

Many thanks for referring this gentleman with hepatitis C associated chronic liver disease. Dr. Gilmore has recently seen him in Dr. Hay's clinic. He has very tense ascites with marked oedema of the abdominal wall and legs which has not responded to diuretics.

We will be arranging admission within the next week or two for treatment of his resistant ascites and for work-up for consideration of a liver transplantation.

Best wishes,

Yours sincerely,

Colin Brown
Locum Senior Registrar
