The Surgery  
Minchinhampton  
Glos

Dear Dr Marlow

Louise Cannon - DOB - GRO-C 1952

GRO-C

Glos

I reviewed this patient in clinic today. She is viraemic with a genotype 3A Hepatitis C virus. The ultrasound scan was unremarkable and so I have advised a day case liver biopsy prior to antiviral treatment. She has discussed this with Mike Bunting and although rather anxious is prepared to go ahead.

Yours sincerely

GRO-C

Professor J Brown  
Consultant Gastroenterologist

liver biopsy  
told it was very  
dangerous proced  
needle into the  
liver, stop breathing  
for minutes!
