Dear Dr Hutton

Re: Hepatitis C Lookback Exercise

Myself in conjunction with Dr Andrew Freedman in Infectious Diseases are trying to put together a bid for funding the treatment of patients infected with hepatitis C.

We need to have figures for each purchaser, ie separately for South Glamorgan, Mid Glamorgan etc. Further to our telephone conversation of 7th August, I would be most grateful if you could send me any preliminary figures for the likely number of patients that are going to be unearthed with a breakdown according to the Health Authorities. I understand that the full information will not be available until the Lookback Exercise is complete but if there are any preliminary figures it would be most helpful.

Many thanks.

Yours sincerely

GRO-C
