Under Care of ... Christine Lee:.....

Ward ... Haemophilia Centre

D. of B.

Date 10.6.88

Dr./Mr. Solomons

Will you please see the above patient, and give your opinion regarding treatment/prognosis/diagnosis?

Clinical Notes and investigations:

This patient has severe haemophilia A.
 (He is also HIV antibody positive)
 He has been complaining of
 recurrent epistaxis & has requested
 cautery. Please would you advise
 on management.
 He is coming to your clinic 9.0 am
 15/6/88 Thank you.

Signed

GRO-C

House Physician/Surgeon

22/6/88 - at 9.00 am

Thank you,

He has markedly swollen nasal
 mucosa and I think this is due to
 allergy. The nasal mucosa is hyperaemic
 and this probably accounts for his
 bleeds.

I have prescribed some beclomethasone nasal
 spray to settle this down. If he is still
 having problems in (1/2) I will see him again

Will consultant, if he thinks fit, undertake the further care of this case?

Signed

GRO-C
