4/1/95	Haemophilia A Age 25 Works for BA Customer Services at Gatwick/shift.
	<u>Haemophilia.</u>
	Cannot remember when last had treatment. No treatment sheets. Mother's address is stable one - he is living in digs / does not have FVIII. Recent admission: GI haemorrhage → endoscopy + treat. Drinking heavily + drugs.
	<u>HIV</u> 18/1/93 - 2 years ago CD4 0.23 - This admission candida - says he has had it off & on for 2 years. Says he is having ranitidine - says he has not had fluconazole. - Needs to start septrin prophylaxis. co-trimoxazole - Needs to start zidovudine. 100mg QDS.
	<u>HCV</u> AST 25 Discussed - advised ↓ alcohol
	<u>HBV</u> Good Ab. Response
	<u>HAV</u> not vaccination.
	Alcohol a problem: last 12 months very difficult - went out to 'self-destruct' on Sunday night i.e. drink +.
	Planning to leave friends at GRO-C + go back to GRO-C to grandmother.
	Rec Gets sick certificates from Dr McMannus for stress. Says Kings is expert at HIV - boyfriend at time was under Mary Burgess + Dr McMannus.
	To talk with GRO-D this afternoon GRO-C
