Dear Dr Byrne,

Patient: Mark Ward (Mr) ) RFH 919375 – DOB **GRO-C** 69  
**GRO-C**

## Special Combined Clinic – 21<sup>st</sup> December 2004

Consultants: Dr Margaret Johnson – Consultant Physician  
Professor Christine Lee – Consultant Haematologist  
Dr Thynn Thynn Yee – Consultant Haematologist

We reviewed Mr Mark Ward in the Combined HIV/Haemophilia Clinic on 21<sup>st</sup> December 2004. I am pleased to report that he is well and that his renal function is now returning to normal with a normal creatinine and a urea of 7.6. I do note that his lipids are elevated and I am arranging for us to do fasting lipids. We may change his anti-retroviral therapy because of this. However, I have suggested that we should await his knee replacement and I will review him in February when we will make a decision.

Yours sincerely

**GRO-C**
