Phone for results - some improvement
but throat still sore
& tongue still "peeling"

Results of smears no abs.

Advised - further 1/2 fusarazole - try to get from S.P.
- try Difflam routine.

Contact us 1/2 if no better.

Mrs Wood phoned (Mark not aware)

Mark has recurrence of throat infection -
just about to start pharyngitis
she thinks it is partly related to poor
housing. - I have confirmed that Dr. Lyttelton's
letter has been sent.
Mark will contact us 1/2 if throat not
improving

GRO-C

17.8.

Still problems:

I. severe burning of tongue

II. dysphagia

discomfort with hot drinks

III. cough associated w/ persistent hoarseness in
throat

no pain or night sweats

good weight -

no diarrhoea

still problem w/ recurrent skin rash

OK -

Mark: much improved

healed areas - some discoloration

still residual area of desquamation lateral
aspect of tongue
