17/3/12 1300	Dr W. Fisher (wife, mother, father, thin brother, aunt) Prof Fisher present. Explained current situation → GSK cepin → which was to probably ASX → but stepped up to new family → multiple organ failure → uncontrolled acids → wound by chronic health problems We have some renal treatment & support option, but the chances of survival are very slim indeed. They understand, are very upset but thanked us for our care.

17/3/12	Human SpR JINHA 1300pm. Progress noted - multiple organ failure - Given reg. Venous pump support Bleeding settled. Coffee grounds noted in NG aspirate - not felt to be significant. Overwhelming brain reg. support certainly would cause paroxysms + unlikely benefit to add to management by doing BM. Dr Prof Par → give 2000 Gb Refact Rpt ready Keep fbr > 1.5 → give CRXO INR < 1.5 " AFP OID > 80 Further steps of Refact left with it.
