9th April, 1985.

Dear Director,

Re: Haemophilia Investigation And Treatment.

I am sorry to inflict yet another questionnaire upon you but I would be grateful if you could complete the brief one enclosed and return it to me in the addressed envelope, before the end of April.

The information is needed because I have been asked to participate in the assessment and revision of the ACDP Guidelines and it would also help me to assess the demand for heat-treated factor VIII and IX concentrates. If you have any more detailed observations, I would be grateful if you could set these out in a separate letter.

Thank you for your help.

Yours sincerely,

GRO-C

A.L. Bloom.
