IRELAND

Dear Dr Mayne

One of your patients who was enrolled in the Concorde trial **AX11012**, initials **GRO-A**, date of birth **GRO-A**.55 died on **GRO-A** 1992. We would very much appreciate further clinical details of his death. If you could let me know the cause of death and also any clinical details of his pre-terminal illness. I enclose a follow-up form and if this could be completed with details up to his time of death I would be very grateful.

Thank you for your help.

Best wishes

Yours sincerely

GRO-C

Ann Marie Swart MRCP
